Stroke is a leading cause of serious, long-term disability in the United States.

(NHPP; MMWR Morb Mortal Wkly Rep. 2001;50:120-125.)

Peripheral arterial disease (PAD) affects about 8 million Americans and is associated with significant morbidity and mortality.

(JAMA. 2001;286:1317-1324.)

About every 25 seconds, an American will suffer a coronary event, and about every minute someone will die from one.

(AHA computation based on latest available mortality data.)

Stroke is the third leading cause of death in the United States.
