

Heartscan Services “Saving Lives One Heart At A Time”... Get Screened.

- On average, every 40 seconds someone in the United States has a stroke.
- About every 25 seconds, an American will suffer a coronary event, and about every minute someone will die from one.

(AHA computation based on latest available mortality data.)

A Healthy Body Is A Lean Body.

While no one product can single-handedly remedy all of our problems, it's imperative that we get serious about supporting and improving our health through screening, nutritional cleansing and overall wellness.

A Healthy Heart is in your hands

Early Detection Is The Key To Prevention.

Convenient Mobile Heart, Stroke, PAD, Diabetes, Thyroid Screening

- WE ARE MOBILE- WE COME TO YOU
- STUDIES PERFORMED BY A CARDIAC SONOGRAPHER
- STUDIES READ BY BOARD CERTIFIED CARDIOLOGIST

The 30 minute screening evaluates your risk for Cardiovascular Disease

We perform the following screenings:

- Carotid Doppler Ultrasound (to identify risk for stroke)
- Echocardiogram (looks at size, shape and function of heart muscle)
- ABI (peripheral arterial disease and diabetes)
- Thyroid (nodules)

Know Your Risk For **\$199**

Heartscan Services Nutritional Program:

Our Program Addresses Nutrition And Toxicity

Obesity Has Become A Major Health Concern.

- 1 in every 3 adults is obese and almost 1 in 5 youths between 6 and 19 is obese.
- **Obesity by itself has been shown to increase the risk for heart disease, stroke, diabetes, sleep apnea and other diseases.**
- The CDC also reported that we are spending over \$75 billion a year on weight related diseases.

Heartscan Services Has A Revolutionary Program To Help You Discover A New Level Of Health And Vitality You Never Knew Existed. Transforms Your State Of Wellness By:

- Optimized nutrition, support for cellular function, healthy weight loss, improved energy, support the body's immune system, rid the body of harmful toxins, alkaline based program.

We have successfully helped hundreds of people lose weight and reduce their risk for heart disease, stroke, diabetes as well as obesity. This is a one of a kind Nutritional Cleansing System.

Sal Ferrante, MD - "The program is very easy to follow and I have lost over 45 lbs so far and feel 10 years younger. My snoring at night has stopped; my hips and knees no longer hurt and I have more energy than I have had in years. I totally endorse this system and have actively shared it with others. In fact, over half of my department is using the system, with great results. Thanks Heartscan Services again for the advice. "

Toxicity And You...

Think about it:

We change the oil in our cars and trucks so they don't break down, we change the filters in our heating and air conditioning systems to keep them running properly, we brush our teeth to prevent decay. We seem to understand the concept of prevention in protecting our investments yet we ignore our most important asset: our body.

- A recent study by the Center For Disease Control (CDC) reveals the presence of 116 toxic chemicals in people of all ages.
- **Many scientists and doctors now believe that toxic overload is contributing to weight gain, obesity, diabetes, heart disease and many other diseases.**

Paul Anderson, MD - "The biggest problem I see with toxicity is body inflammation. You get a massive inflammatory response and that creates a lot of problems."

Nicole Kafka, MD - "We are putting all kinds of garbage in our bodies and our bodies are then accumulating fat to protect us."

Pain Management

Chronic pain is often associated with other medical conditions and affects many areas of a patient's life, impacting their quality of life and wellbeing. Heartscan Services has partnered with a multi-disciplinary team of

specialists to treat various conditions related to chronic pain. The program focuses on interventional procedure. The goal is to reduce the use of addicting medications, and manage pain, so patients can regain control and improve the quality of their lives.

Sleep Apnea

Sleep apnea can also lead to serious health problems over time, including diabetes, high blood pressure, heart disease, stroke, and weight gain. But with treatment, you can control the symptoms, get your sleep back

on track, and start enjoying what it's like to be refreshed and alert every day. **Lose weight.** Some people find that even moderate to severe sleep apnea can be completely corrected by losing excess weight. For others, even a small amount of weight loss can open up the throat and improve sleep apnea symptoms.
