Marilyn Martinucci  
Heartscan Services-President  
155 Executive Drive  
Manhasset hills, NY 11040

Dear Marilyn,

It is not often that we get a chance to look into life's "crystal ball" to determine the future of our health. Fortunately, I was provided with that opportunity several weeks ago when I participated in a cardiovascular screening with your company.

The screening was non-invasive, painless and took less than 30 minutes. As an active, healthy, asymptomatic 40 year old male, who knew that I could be carrying around two potential health problems that could affect my future.

My screening in Brooklyn, NY uncovered the fact that I had:

#1 - a bicuspid valve

and

#2 - a seriously abnormal echocardiogram

The conclusion on my report from the reading Cardiologist was as follows; "strikingly abnormal echocardiogram, if this patient is not currently under the care of a cardiologist he should get a referral for such care." Many of us will never see a physician for these types of conditions because we are unaware that they exist in our body until it is too late.

Heartscan was my "crystal ball" and now I can take the necessary steps and follow up needed to prevent having a future cardiac event.

I would like to thank Heartscan Services and their team for providing such an important program to the community. This screening has the potential to change the lives and future health of many people.

Sincerely,

Jeffrey L.
